

## **Replacement of No-Fee Version of ISIS/Draw with Symyx Draw (for academic and non-commercial personal home use)**

### **General FAQs Regarding ISIS/Draw Replacement:**

#### **Why is Symyx removing the no-fee academic/home use version of ISIS/Draw and replacing it with Symyx Draw?**

- We want to provide our academic and home use customers with the latest technology and features we are offering in a drawing package.
- Symyx Draw is a full replacement for ISIS/Draw, containing all of the features of ISIS/Draw plus many more.
- Symyx Draw provides more programming flexibility and more efficient structure drawing than ISIS/Draw.
- Graphics creation and presentation are highly valued by our academic customers. Symyx Draw provides significant improvements over ISIS/Draw in these areas.

#### **Can customers still download the free version of ISIS/Draw?**

- No, we have replaced this with Symyx Draw, as Symyx Draw is a complete replacement for ISIS/Draw.

#### **Is there any functionality missing from Symyx Draw that was included in ISIS/Draw?**

- No, all the functionality exists in Symyx Draw, plus more. Please visit <http://www.symyx.com/getdraw>. Click the "Compare Features" button for a side-by-side comparison to ISIS/Draw.

#### **What are the main usage differences between ISIS/Draw and Symyx Draw?**

- For a listing of the differences in usage that might be found with Symyx Draw, please see the Symyx Draw help file (inside Symyx Draw). Open Symyx Draw and go to: Help -> Show Help (or "Help Online File") -> Key Differences -> Key Differences: for users of ISIS/Draw.

#### **Does Symyx Draw support kanji?**

- Yes, Symyx Draw supports kanji. As such, we are removing the free kanji-supported version of ISIS/Draw.
